# GLADIOLUS

1942

EDWARD C. NEW

13 FRANK ST. • WARSAW, N. Y.

# Descriptive List for 1942

First of all we wish to thank all our friends for their generous patronage and unusual amount of cooperation, not only during the past year, but in years previous. We are pleased to note an increase of customers along with those who send us an order each year. This indicates that we are on the job and always trying to please.

Our usual guarantee holds good again this year—and that means that all stock we send out must please; on the other hand if we have made an error in any way, or if for some reason the stock fails to please, be sure to let us know at once and we will be glad to adjust the matter to your entire satisfaction.

*About Varieties:* It is a well known fact that one grower cannot grow and list all the many good varieties that are grown today. It is very difficult to have a test garden large enough, also to find time enough to try them all. We do, however, test many new varieties each year and it is gratifying to know of the constant progress being made in most color classes. During the past season we have observed several good varieties, most of these will make a real place for themselves. Some of these we are listing in the fore-part of this list and suggest you secure such amounts of stock as you can. You will find the prices are moderate for varieties so new and of such high caliber.

*Terms:* All quotations herein are for cash with order, however you may enclose a deposit of 25% and reserve your order to be shipped at a later date. You may then send us the balance or we can forward your shipment C. O. D. for the balance. All prices in this list are quoted prepaid, and we prepay the express or mail charges on all items listed herein. We will not substitute unless you specify otherwise. If your order amounts to \$2.00 up to \$5.00 you may deduct 5% for cash with order. On cash remittance in full on orders of \$5.00 and upwards you may deduct 10%. We include valuable extra bulbs with your order, bulbs of such varieties that we feel sure you would like to try.

It is natural that anyone buying bulbs is interested in knowing just how the crop was handled. First of all we locate new soil each year; soil that is known to be well adapted to our crop; and this soil is new and free from any contamination, also has no strays left in the field to come up again and create a mixture. All stock is treated with an approved disinfectant before planting. The crop is then kept clean of weeds as possible, both by machine and hand weeding. We grow the natural way, that is, without artificial irrigation and without over-fertilizing. We are certain you will find our bulbs entirely to your liking.

*Commercial Growers, Dealers and Jobbers:* If you have need for large quantities of varieties which we list, write us for quotations.

**GLADIOLUS SOCIETIES:** We belong to various organizations. If you are not as yet a member of any society which is working for the best interests of the culture and publicity of our fine flower, you are surely missing something. Practically all States now have their own Gladiolus Society, and if you do not know who to get in touch with to join, just drop us a line and we will see to it that you become a member of your favorite society.

**THE EMPIRE STATE GLADIOLUS SOCIETY:** We have here a real live organization. It would be hard to locate a source of so much real pleasure as you would get out of being a member of this Society. The Bulletin, which is issued regularly, is full of

timely information. On top of that you have the privilege of exhibiting your blooms at our annual exhibition, which is considered one of the largest and best in the entire country. Also fast becoming famous, are our weekly seedling and regional shows. It is through these weekly shows, which are held during the blooming season in various parts of the State, that several leading varieties become known. Also exhibited are several new varieties that would ordinarily miss the annual show. Beside the fellowship and the many new friends you meet make the events all very worthwhile. *All this* for one dollar. Mail me your dues and get some valuable bulbs free.

THE NEW ENGLAND GLADIOLUS SOCIETY: Now conceded the leading Society of its kind. Too well known for elaboration here. Same offer on free bulbs holds good here, too. The Year Book is now being mailed, and if you have never had a copy of this valuable book, you don't know what you have missed. The regular membership is only one dollar and you get the book. The two dollar membership is well worth the small price, for in addition to the Year Book, you get quarterly supplements which will keep you up-to-date throughout the year. We strongly urge your membership in both these two societies, if you are really interested in *glads*.

## RECENT INTRODUCTIONS . . .

This list is intended to cover varieties of recent introduction which we now grow and find them all to have considerable merit.

AMERICAN COMMANDER: Our own introduction. Tall, vigorous grower. Color is a clear lustrous solid blood red. This has been on the market but a few years, and during this time we have received reports of such uniformly good performance, that we are sure now that it is certain to be a leading red for commercial use. And for the home garden it has been found to be outstanding, and this is true, for it really stands out and above the others in this particular color class, to say nothing of the others. Visitors looking over our field each season always remark about the wonderful uniformity the rows of AMERICAN COMMANDER display. If you are looking for a real red to take the place of some of the less-stronger growers you have been trying, be sure to get a stock of this headliner. Our experience here in our own flower shop, along with the enormous wholesale demand indicates what we have previously said and claimed; namely that AMERICAN COMMANDER now is *the* red.

Propagation qualities of this glad are good. Bulblets are moderate in size and all sizes of bulbs yield a good amount. Bulblets often bloom, in fact you may expect all sizes of bulbs to produce good long spikes. The florets are large and we usually find six, seven and sometime as high as nine florets open in good condition at once. The flower head is of good length and placement and facing is uniformly good. The texture is very good. Spikes may be cut tight for shipping and will open well in water. AMERICAN COMMANDER is known to be a good keeper. Here you have a red that is well balanced as to spike, form and performance. We have a good stock of this variety now and it would be good business to invest what you can in blooming sizes, planting sizes or bulblets.

Prepaid prices are as follows:

	No. 1	2	3	4	5	6	Bulblets
Per Each .....	.50	.40	.30	.20	.15	.10	....
Per Ten .....	4.00	3.20	2.40	1.60	1.20	.80	.20
Per 100 .....	22.00	18.00	15.00	10.00	7.50	5.00	1.50

Five bulbs may be purchased at the ten rate. 25 or 50 at the 100 rate.

**CHARMAINE:** Another introduction of ours. This variety fills the need for an early glad having good sized florets of a new color, a color that has been needed in glads, a rich rose. It is about the same shade as that found in "Happy Days" rose. This is a color that has found instant appeal with florists. It is an early glad and like other varieties that are early, we find it produces the best results if planted early as possible. Growth is rapid and it stands quite tall in the field. We have cut spikes that were equal in every way to a good spike of Picardy, but of an entirely different color, and way earlier besides. CHARMAINE always grows straight, has a head of usually 18 to 20 buds with usually six florets open in good condition. Facing and placement is uniformly good. Texture fair. CHARMAINE is a very good propagator, producing an abundance of bulblets that germinate freely. Reports on this variety have been very gratifying and we are sure you will like it.

	No. 1	2	3	4	5	6	Bulblets
Each .....	.30	.25	.20	.15	.10	.05	....
Per Ten .....	2.40	2.00	1.60	1.20	.80	.40	.15
Per 100 .....	15.00	12.00	10.00	7.00	5.00	3.00	1.00

## GLADS *by* MARION RICH . . .

**BIG TOP:** New this year. This big glad will no doubt satisfy anyone looking for a glad large enough to take the prize offered for biggest floret in the show. I have seen large florets produced right here in our own fields, but this year when I saw BIG TOP open, it made Miss New Zealand in the next row look small. The beauty of this variety is that the rest of the plant is in proportion. Also, unlike some other giant sorts, the color comes clear with us. It is a light pink with a small carmine feather in throat. In general it is a straight grower, with usually good placement. Healthy, prolific and a good bulblet germination. The originator's notes give the following figures: Height 62 to 76 inches; 28 to 32 inch flower head; florets 6½ to 8 inches across with up to seven open; 20 to 22 buds. A fair sized stock of this makes these low prices possible, and a very good buy it is.

Prices are:	Large	Medium	Small	Bulblets
Each .....	.50	.40	.30	....
Per Ten .....	4.00	3.20	2.40	.50
				Per 100 3.00

**MISTY DAWN:** New last year. If we were to pick what we consider the ten best glads we would surely include MISTY DAWN. This glad made a hit every where shown last year; won the ribbons, too. A very outstanding smoky grey with a touch of salmon, having a smoky red blotch. Healthy, strong grower, usually straight. Mr. Rich gives these figures: 54 to 69 inches tall; 22 to 28 inch flower head; florets 5½ to 6 inches in diameter; 6 to 9 open; 18 buds all told. We had it this year with as high as eleven open, and a more impressive spike would be hard to find. Midseason.

Prices are:	Large	Medium	Small	Bulblets
Each .....	.50	.35	.20	....
Per Ten .....	4.00	2.80	1.60	.50
				per 100 4.00

**MIDNIGHT RED:** Growth and performance of this glad was very good again this year. Color is very dark red, not quite as dark as Morocco, but much larger and with more open. It is livened up by a narrow cream stripe on the lower petals. We are proud to offer this distinctive glad and are sure if you like dark glads, you will enthuse over this

one. Always grows straight with us; is healthy and a good propagator. A taller and better proportioned plant than most dark reds.

Prices are:	Large	Medium	Small	Bulblets
Each .....	.35	.25	.15	....
Per Ten .....	2.80	2.00	1.20	.30
				per 100 2.00

### THREE NEW LAVENDERS . . .

**BADGER BEAUTY:** (Krueger '41) A fine medium decorative of clear moderately light lavender with a creamy white throat. We saw this at Mr. Krueger's exhibit at the Midwest Show at Chicago last August and liked it very much. Later in our field it came into bloom and it looked still better. A little earlier than Minuet and it appears to be a better grower and propagator. We are sure this will become very popular. Large, each \$2.00; Medium, \$1.50; Small, \$1.00; Bulblets, each .20—10 for \$1.60 and \$12.80 per 100.

**ELIZABETH THE QUEEN:** Introduced by Elmer Gove in 1941. We grew this from small bulbs and bulblets and it came into bloom during the dryest part of the season. With us the growth was very good and the spikes produced their full quota of bloom. This was grown right out in the field and did not receive special culture. We found that the bulblets germinated promptly and made nice growth. It is really a beautiful glad; we consider it one of the most beautiful of all. It has a glowing mauve shade of lavender that should make it a fine variety for most any kind of design or work. We predict a fine future for this glad. Large, decorative, ruffled. Large, each \$2.50; Medium, \$1.50; Small, \$1.00; Bulblets, each .25. Per Ten \$20.00; Medium, \$12.00; Small, \$8.00; Bulblets, \$2.00.

**LILAC GEM:** (Glad-A-Way Gardens 1942) This is a midseason variety of good health and growth. Color is sort of a lilac-lavender with some deeper flecking and small blotch of violet. 4 inch florets with 8 open on a good length spike. We think the color very nice and it looks like it would be a very useful variety.

Price is \$3.00 each for any size bulb. No bulblets.

*Note:* The above named three varieties all performed nicely for us and we believe each has a place in your collection of choice glads.

### TWO SPORTS of PICARDY . . .

**BINGO:** With us the color is sort of a buff-cream with a blotch similar in color to Picardy. This should make a good cut-flower variety.

Prices are:	Large	Medium	Small	Bulblets
Each .....	.20	.15	.10	....
Per Ten .....	1.60	1.20	.80	.25

**MOONSTONE:** This sport seems to grow larger and better than its parent. Coloring is very unusual, being a creamy white with a slight tinge of lavender, all clear and even. Try it.

Price is \$1.00 for any size bulb.

TWO SPORTS of MARGARET FULTON . . .

No. 1: This one is the one we call the cream sport. The color is hard to describe, it is sort of an ivory cream with a tint of blush in the throat. This makes up beautifully in most any sort of an arrangement. Otherwise the same as Fulton, and we all know what a good glad Fulton is.

No. 2: This sport has about the same color as old Break O' Day, only a little brighter. This is Fulton all over again, except the florets seem to run a little larger. We suggest you try these interesting sports.

Prices on both are:		Large	Medium	Small	Bulblets
Each	.....	.25	.15	.10	10 for .10
Per Ten	.....	2.00	1.20	.80	100 for .75

MOTHER KADEL: We first saw this new yellow glad at the Hagerstown Show in '40. It impressed us as being the best yellow we ever saw. We still think it is. The color is clear medium yellow. With us it grew to a good height and was straight and healthy. Usually shows six florets open in good condition, with facing and placement exceptionally uniform. This variety has already many awards to its credit. We believe you will eventually grow this one.

Prices are:		Large	Medium	Small	Bulblets
Each	.....	.50	.30	.20	10 for .25
Per Ten	.....	4.00	2.40	1.60	100 for 2.00

PINK RADIANCE: (Quackenbush) Beautiful clear light pink. Has a small touch of carmine in throat. Introduced by Mr. Quackenbush in 1941 and during the past show season it won several blue ribbons. It is a variety of exceptionally nice habits. Its color is very appealing, and it has florets of very good substance and form. We are sure you will be well pleased with this variety when you see it. I might add that Mr. Quackenbush is offering for the first time, this year, another fine glad, Intermezzo. We do not have this yet, but suggest you get a start in both these fine glads.

Pink Radiance prices are:		Large	Medium	Small	Bulblets
Each	.....	.60	.40	.20	5 for .25
Per Ten	.....	4.80	3.20	1.60	25 for 1.00

GENERAL LIST

Variety	Per	Large	Medium	Small	Bulblets per
ADLER: Tall, large flowered clear red, good, but head medium length.	1 10	.10 .80	2-.15 .60	2-.10 .40	100 .75

PURPLE BEAUTY: Large round flowers of deep rich purple. Very good.	1 10	.15 1.20	.10 .80	2-.10 .40	100	.50

## FLORA FARMER (Quackenbush)

Although introduced only in 1939 this variety has demonstrated its ability to win in its color class at many of the major gladiolus shows. However, we wish to especially direct your attention to its possibilities for decorative purposes and as a commercial cut flower. Its unusual shade of deep radiant pink and creamy white throat have great color value. The beauty of its slightly ruffled florets and the fact that nearly all of the buds show color by the time the first floret opens give it additional value for florists use. During the past summer the originator was able for the first time to furnish this variety in any appreciable quantity to the florists of Harrisburg. It met instant and uniform approval and at no time during the season did he have a surplus of blooms of this variety.

The strong sturdy spikes do not crook. Although it is a vigorous grower it appreciates good culture. Well grown spikes are about 48 to 50 inches tall. However, the heavy foliage is so loosely attached to the spike that it can be pushed back and the spike cut to the ground without injury to the plant. It opens 5 to 6 or more florets at a time on a spike of 18 buds. It produces plenty of bulblets which germinate readily and make strong growth. We urge you to give it a thorough trial.

## PINK RADIANCE (Quackenbush)

This variety was introduced in 1941 without any special advertising and with the modest statement that the originator believed that it would be successful as an exhibition variety and as a commercial cut flower. Only a few bulbs were sold and no bulblets were released. During the 1941 show season it was exhibited by only three or four persons yet it won more than a dozen blue ribbons in its color class at important gladiolus shows. Because of the vigorous growth which the variety makes from any size bulbs, the originator was able to furnish several hundred spikes, mostly from small bulbs, to the florists of Harrisburg. The favor with which it was received by the florists and its excellent growing habits confirms our opinion that the variety holds great promise as a commercial cut flower.

Pink Radiance is a pure light pink self color with a slight touch of carmine deep in the throat. It is a Picardy x Minuet seedling with many of the excellent qualities of its parents and which thus far has not shown some of their faults. It makes a spike 55 inches or more in height which does not crook. It opens 6 to 8 5½ inch florets on an 18 bud spike. When cut in the bud it opens out well in water. It produces plenty of bulblets which germinate well and make strong growth. In order that commercial growers may be able to give it a trial we are offering all sizes and bulblets at wholesale and are also offering some special collections.

## WANTED . . .

Our business is growing bulbs, and we make our entire living from the flower business, having also a retail flower shop.

Our hobby is collecting material pertaining to the early automobile. Naturally we wish to obtain old automobile magazines, catalogs, etc. If you have any or can obtain some let us know and we will buy for cash, or we will be glad to make you a liberal offer in bulbs.
